↓ You can download file releases of Tera Term project from here.

List of release files

Package/Release/File	Size
▼ Tera Term	
▼ 4.65 - [Release Notes / Change Log]	
 teraterm-4.65.exe 	7.5 MB

To install the program, run the downloaded file and choose the compact installation according to the following figure.

How to use Tera Term

After running Tera Term you have to choose the connection type. Choose the Serial connection and then choose the serial port of your computer. If you are using a USB to Serial adaptor, choose it from the list.

Now you should configure the serial port. Choose **Serial port** from **Setup** menu

And configure the serial port options:

Now everything is ready for you to use Tera Term.
